

COUNTY SERVICE AREA NO. 30
SEWER SERVICE

County Service Area No. 30 (CSA 30) was formed on November 2, 1965, to construct and maintain a wastewater collection, treatment and disposal system for the community of Nyeland Acres. CSA 30 service area consists of 177 acres lying within an area bounded by U. S. Highway 101 on the south, Santa Clara Avenue on the west, Del Norte Boulevard off-ramp on the east, and the Nyeland Drain on the north.

The original sewer collection system was a Septic Tank Effluent Pump (STEP) system. The STEP system consisted of 249 individual interceptor tank/effluent pumping units with approximately 469 residential service connections and 20 miscellaneous business connections. The STEP system was replaced with a conventional gravity system and a lift station in 1999. There are 2.9 miles of sewer lines.

Since December 1998, the sewage has been discharged to the City of Oxnard for treatment and disposal. The treatment plant was removed in 1999.

Water and Sanitation Department manages the system. Ventura Regional Sanitation District operated and maintained the system under a contract with the County until June 30, 1999. On July 1, 1999, Water and Sanitation Department assumed operation and maintenance responsibilities as well. The County Board of Supervisors is the governing body.
